

# KubeCapture V3

## Kubernetes Community Days Denmark 2024

## Let's get our mission briefing

KubeCapture: Ready when you are.

Nele: We have identified a target which is dumping tons of toxic waste into the ocean. We need to stop them.

KubeCapture: I'm ready to help. What do you know about the target?

Nele: We found a public support issue from one of their engineers you can build on.

KubeCapture: Perfect. Send me the link...

Nele: ... sending link ...

I got this specific couchdb query which is pretty slow:

```
{
  "selector": {
    "$or": [
      { "type": "ship", "status": "hunting", "target": { "$regex": "whale" } },
      { "random_field": { "$gt": null } }
    ]
  },
  "fields": ["_id", "name", "location", "captain"],
  "limit": 10
}
```

😊

Owner

I fixed it for you and built a new image version here:  
docker.io/apaches/couchdb:3.3.3-patched

I'll create a merge request after some more testing, but this image should work.
