# My turn, our turn, your turn

# My turn, our turn, your turn

The background features a stylized underwater environment. At the top, wavy white lines represent water surface ripples against a light blue gradient. In the center, large white text reads "Give one, get one". The bottom half shows a darker blue ocean floor with a small patch of coral reef on the left, featuring yellow and green tentacles. Two orange seahorses are swimming near the reef. On the right side, two white fish with dark blue fins are swimming away from the viewer. A single yellow starfish is visible in the upper right corner.

Give one, get one

## Team Topologies by Matthew Skelton and Manuel Pais

[teamtopologies.com](http://teamtopologies.com)

The children have forgotten their numbers.  
Can you work out what their numbers must be?

- Mandy has four tens.
- James' number is less than 30 and has 8 ones.
- Pippa's number, has two digits the same.
- Salem has a number greater than 50.
- Robin has 9 tens.
- Mav's number has 3 ones.

100 Pippa	fifty-one Salem	47 Mandy
twenty-eight James	13 Mav	ninety-two Robin

Can you prove that you are right?  
Cause I did it right.

Feedback
